Very worthwhile. However, I think that this course may be too intense to be effectively taught during a summer session. When you have to assign major homework due Sunday morning two days after the final exam, it might be an indication that there's too much material to cover in the time allotted.

This was a great course to take. I just transferred to the BSCS program from Mechanical Engineering around April (after completing my second year), and this really helped lessen my workload during the school year. I took this class instead of any other CS elective, because Professor Bloomfield was teaching it. I had taken CS2150 during the spring this year, and it was my favorite class. Actually, after hearing horror stories about it, and then eventually having it be my favorite class, was the reason I switched majors. Professor Bloomfield really does care about the subject and students, and it is visible in his teaching style and general behavior.
