I have heard horror stories about 2150 since coming to UVA. I tailored my schedule this semester so that I would have time to adequately prepare for this class and do all the labs. I think this was a good decision, because 2150 is a ton of work. I learned a great deal of information, and I think this course serves as a solid gateway into other CS topics (it sets up Comp Arch, Algo, and OS pretty nicely). I don't have much negatives to say, because I knew what to expect from this class and was able to manage my time effectively. Perhaps increasing the credit limit to 4 would be a good decision considering the vast amount of information that is covered. Bloomfield is an awesome professor, and certainly one of my favorites that I have had at UVA. I am taking his defense against the dark arts course next semester, and I hope that it is taught in a similar structure because it works for me.

I didn't have Bloomfield so I can't answer most of this form.

None.

Had no interaction with Prof Bloomfield. Comments left in evaluation submitted for Floryan.

I am taking this survey for my lab. I was in Floryan, so I put Not Applicable for all questions referring to Bloomfield just to be safe. My Lab TA's were all excellent at explaining the task at hand and the concepts involved.
